

Addition and Subtraction: Grade 2

Note-Taking Guide

TEKS

- 2(4)(A) The student is expected to recall basic facts to add and subtract within 20 with automaticity.
- 2(4)(C) The student is expected to solve one-step and two-step word problems involving addition and subtraction within 1,000 using a variety of strategies based on place value, including algorithms.

Problem

Ms. Rhodes has two boxes of stickers.

- She has 174 stickers in one box.
- She has 268 stickers in the other box.
- She gives 76 stickers to another teacher.

How many stickers remain in the two boxes?

Work Sample: Student 1

Notes

Work Sample: Student 2

$$174 + 268$$
$$(100 + 70 + 4) + (200 + 60 + 8)$$
$$300 + 130 + 12$$
$$300 + 142 = 442$$

Notes

Work Sample: Student 3

$$174 + 268 - 76$$

$$100 - 2 + 268$$

$$368 - 2$$

$$366$$
