Exit Slip: Day 2

Label the success criteria based on your personal understanding of our learning intentions. Marking a 5 indicates that you have mastered the learning intention.

1. I can describe the actions of proficient mathematical problem solvers and explain how to support the development of these characteristics.
   1  2  3  4  5

2. I can explain the meaning of heuristic and describe how it applies to a problem-solving model.
   1  2  3  4  5

3. I can describe appropriate applications of a problem-solving model heuristic in kindergarten mathematics.
   1  2  3  4  5

4. I can explain each of the five practices and how each contributes to making meaning in mathematical discussions.
   1  2  3  4  5

5. I can describe how a problem-solving model, the five practices that support mathematical discourse, and mathematical language routines promote equity.
   1  2  3  4  5
